

THE CARE OF THE ESTATES

The Bloomfield Estates Improvement Association is composed of the owners of property within the Estates. Its purpose is to look after the upkeep of the tract, including the roads, trees, shrubbery, park and lake. The revenue for this work is obtained by a small annual assessment on each lot. The officers serve without compensation and devote a good deal

of time to the association's interests.

The building committee passes upon all plans and every effort is made to see that all improvements are in harmony with the general surroundings, which is to the interest of all property owners. This locality is destined to be one of the most desirable residence districts in the vicinity of the state's metropolis.
